This is common if a Windows 9x/ME driver is installed on Windows 2000/XP • Each hardware component should normally communicate a basic device ID to Windows.. If the hardware does not have this device ID or Windows does not recognise the device ID of the hardware, then the device is listed as unknown.. If you need more help, please contact us or participate in the discussion in our forum.. - Amazing support team. Xcode project for mac WHY DOES THIS HAPPEN?There are many reasons that a Device Manager will list a device as unknown and hence, there is no foolproof way to troubleshoot the error.
